**Amendments to the Claims:** This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

1. (Currently Amended) A method for limiting access to an information network, comprising the steps of:

displaying a web page;

allowing navigation from said web page to a web page of a different domain up to a specified Navigation Boundary, said Navigation Boundary representing a number of domains away from said web page, substantially within which a user may navigate, and substantially beyond which a user may not navigate, and wherein said number of domains represented by the specified Navigation Boundary is at least one;

disallowing navigation to a web page of a different domain beyond the Navigation Boundary.

2. (Original) A method according to claim 1, wherein the information network is an intranet or a global information network.

3. (Original) A method according to claim 1, further including the step of disallowing navigation to predetermined domains.

4. (Original) A method according to claim 3, wherein the information network is an intranet or a global information network.

5. (Original) A method according to claim 1, wherein the information network is an intranet or a global information network.

6. (Original) A method according to claim 1, wherein the web page is a home page of a browser program for the information network.

7. (Original) A method according to claim 6, further including the step of disallowing navigation to predetermined domains.

8. (Original) A method according to claim 7, wherein the information network is an intranet or a global information network.

9. (Original) A method according to claim 1, wherein navigation is allowed only via hyperlinks.

10. (Original) A method according to claim 9, wherein the information network is an intranet or a global information network.

11. (Original) A method according to claim 9, further including the step of disallowing navigation to predetermined domains.

12. (Original) A method according to claim 11, wherein the information network is an intranet or a global information network.

13. (Original) A method according to claim 1, wherein navigation is allowed only via hyperlinks and web pages selected from a predetermined favorites list.

14. (Original) A method according to claim 13, wherein the information network is an intranet or a global information network.

15. (Original) A method according to claim 13, further including the step of disallowing navigation to predetermined domains.

16. (Original) A method according to claim 15, wherein the information network is an intranet or a global information network.
